Address: Stefana Pieńkowskiego 5 Warszawa, Apartment 111, 02-668, Warsaw, Poland (Home)

ABOUT ME

I am a highly motivated and detail-oriented Front-End Developer with a strong foundation in Computer Engineering. My specialisation was Web Technologies and I have a passion for coding. In University I demonstrated my ability to learn new technologies quickly and work effectively both independently and as part of a team. I am eager to contribute to the development of innovative Front-end software solutions. In the future I aspire to be a FullStack Developer

WORK EXPERIENCE

22/11/2019 – 13/03/2020 Warsaw, Poland
QA TESTER TESTRONIC

I worked in a team and we were asked to play video games that are under development to check for errors, glitches or bugs and write detailed reports of how where and when these occur. These would be used by the programmers to correct the issue reported.

16/07/2022 – CURRENT Warsaw, Poland
APPLICATION SUPPORT SPECIALIST FLAIRSTECH

We provide support to customers who use a customer data platform program provided by Upland called Bluevenn.
This includes querying databases to get specific information using T-SQL script.
Connecting Remotely to customers computer using Remote Desktop Manager
The use of Zendesk ticketing system to get and respond to inquiries from customers.
The use of Outlook to communicate internally and to discuss handling and management of customer cases.

EDUCATION AND TRAINING

10/2019 – 05/2023 Warsaw, Poland
BACHELORS DEGREE Vistula University

LANGUAGE SKILLS

Mother tongue(s): **ENGLISH** | **SHONA**

ADDITIONAL INFORMATION

JOB-RELATED SKILLS

Job-related skills

1. I know how to use Microsoft 365 apps like Excel, Outlook, PowerPoint, SharePoint and Word
2. I have experience using SAP, Salesforce.
3. I have experience using Atlassian products including Jira, Jira Service Management and Confluence
4. I have personal experience and have great understanding of HTML5, CSS3, SQL, JQuery, JavaScript(ES6)
5. Knowledge of responsive design principles and mobile-first development.
6. I have familiarity with CSS pre-processors like Sass and CSS frameworks like Bootstrap
7. I have good Knowledge of the JavaScript libraries like React and I am learning Redux.
8. I have junior knowledge of the JavaScript Frameworks, like Vue.js but I am willing to learn more.

PROJECTS

Web Portfolio

I designed a Website as a portfolio for my skills using Sass, JavaScript HTML. It includes JS fundamentals like DOM Manipulation arrow functions. It is fully responsive and is deployed on the internet.

C# Unity Engine Game

I created a Game Stick Streaker using the Unity Engine and with no assets. I designed the characters using Piskel and wrote the C# code in Visual Studio.

To Do List App

I created responsive website with a UI that acts as a To do list, via DOM Manipulation and clever JavaScript. I am able to add tasks to it mark them as completed and delete the tasks after. I used CSS to design it as well

PHP Website

I experimented with PHP in the XAMPP environment and created a website in PHP that allows the user to login and logout and have a personalised page appear to them based and the account that is signed in. The password was encrypted and stored in database in MySQL

Stopwatch App

I created a responsive Stopwatch web application that measures time taken and allows you to stop and start the time. This is done using event listeners and set Interval functions in JavaScript.

Random Quote Generator

I created an web application using JavaScript which randomly selects quotes from an Array of Objects and Displays who said the quote and the quote itself. This applies O.O.P (Object Oriented Programming) as this is what is used to store the person and the quote it also uses ECMAscript (ES7) to loop through the object array.
